SOFTWARE DEVELOPER

Highly motivated and results-oriented Full Stack Developer with a strong entrepreneurial spirit and a deep proficiency in various programming languages and tools. I adopt a comprehensive approach to the entire software development lifecycle. Beyond just coding, I thrive as a collaborative team player, consistently eager to transform creative ideas into tangible solutions.

WORK EXPERIENCE

Packaged app development analyst

Accenture, July 2023 - Present

-My primary responsibility centered around solving bugs, updating libraries and working on improving the security of the website.

-I worked in proactively resolving operational activities.

Fullstack developer

Megatrans, march 2021 - june 2023

-I closely collaborated with Product Owners to design and build a data transmitter for our clients, using different communication protocols. Thanks to my contribution, the data transmitter now operates seamlessly 24/7, improving the efficiency of the company and customer satisfaction.

-I identified and resolved errors in multiple web applications, resulting in a notable improvement in speed and functionality. In addition, I worked on researching new features for the web applications that would further enhance the user experience.

-I developed a full-stack module that creates detailed reports on the different mobile devices owned by the client. I used Angular, .NET Core 3.1, and SQL Server stored procedures to build the module. Thanks to my work, the module has significantly improved the efficiency of the reporting team, reducing report delivery time and improving data accuracy.

EDUCATION

2022 - present
Computer science

10/2021-1/2022
Fullstack MERN Bootcamp

Fullstack MERN bootcamp with the most widely used and demanded programming languages and best practices in the job market. With a duration of 600 hours, and applying agile methodologies simulating a real work environment.
